

## Provider Memorandum

### NextLevel Health's announcement to be acquired by Molina Healthcare

On January 6, NextLevel Health entered into a definitive agreement to be acquired by Molina Healthcare (Molina). As part of the transaction, Molina will assume the right to serve NextLevel Health's approximately 58,000 Medicaid and Managed Long-Term Services and Supports (MLTSS) Members in Cook County.

Subject to regulatory approvals and the satisfaction of other customary conditions, the closing of the transaction is expected to occur in early 2020.

### What does this mean for you?

In terms of immediate day-to-day operations, it's business as usual. Please continue to see NextLevel Health Members and submit your claims timely via the appropriate channels to ensure proper processing and adjudication. Your NextLevel Health points of contacts are the same in the operational and clinical areas. Currently there are no changes to any of our systems and processes.

### Our story continues...

NextLevel Health's journey began a little over five years ago. We were founded as a Care Coordination Entity in 2014 and rapidly grew into a licensed HMO in 2018 and became NCQA accredited in March 2019.

In just five short years, we built a community-based population health model that is highly valued by our Members and the State of Illinois. Molina shares our mission and sees the incredible potential in the membership we have built and serviced within the NextLevel Health organization. Joining forces with a company as passionate about healthcare as us is what takes us into the next chapter in our storybook.

We want to take this opportunity to thank each and every one of you for putting your trust in us over the last five years and bringing us to where we are today. We come to work every day for you. Our provider representatives, case managers, care coordinators... everybody is driven to make patient care better and easier for you. This commitment is stronger than ever during this exciting time.

Sincerest gratitude,

NextLevel Health
